

BFS

Log

Initial State

Graph

Queue

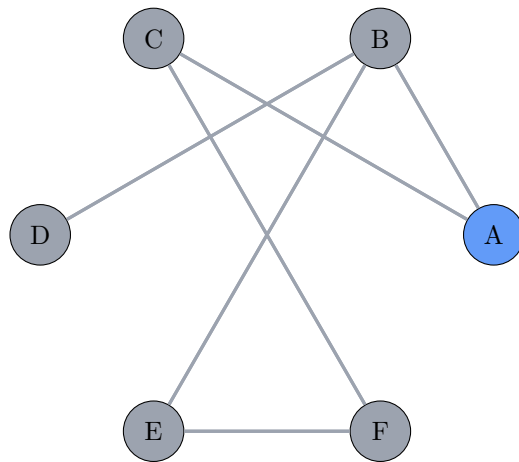

A

BFS

Log

Taking the first node from the queue.

Graph

Queue

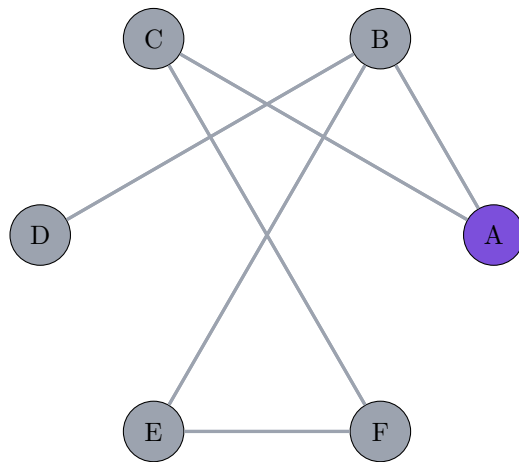

A

BFS

Log

Node A has not been visited yet | marking it visited.

Graph

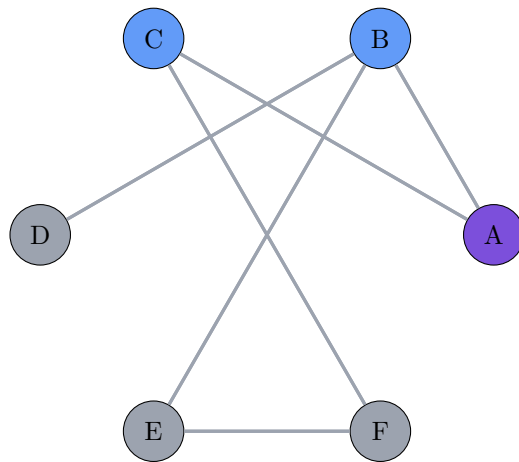

Queue

BFS

Log

Adding A's unvisited neighbors to the queue.

Graph

Queue

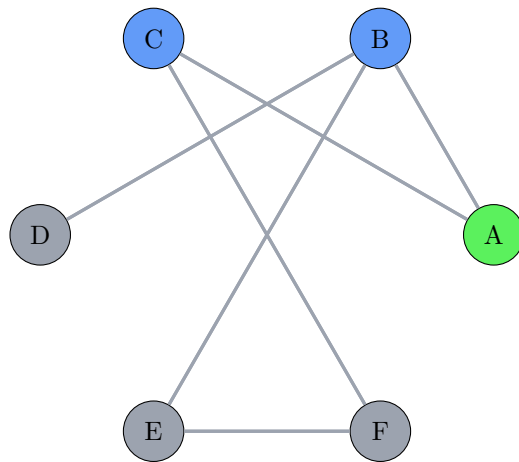

BFS

Log

Adding A's unvisited neighbors to the queue.

Graph

Queue

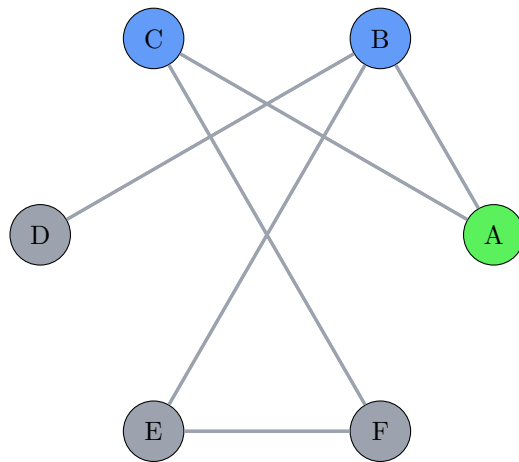

B	C
---	---

BFS

Log

Taking the first node from the queue.

Graph

Queue

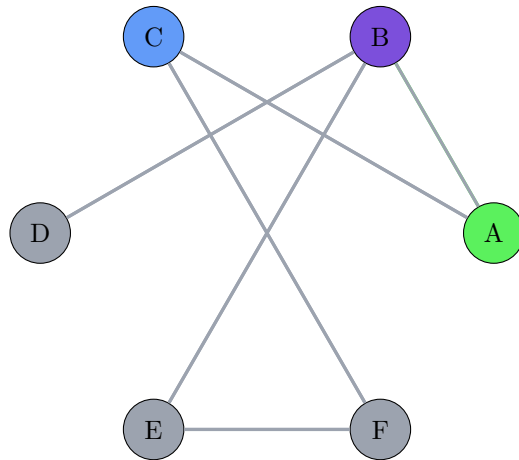

BFS

Log

Node B has not been visited yet | marking it visited.

Graph

Queue

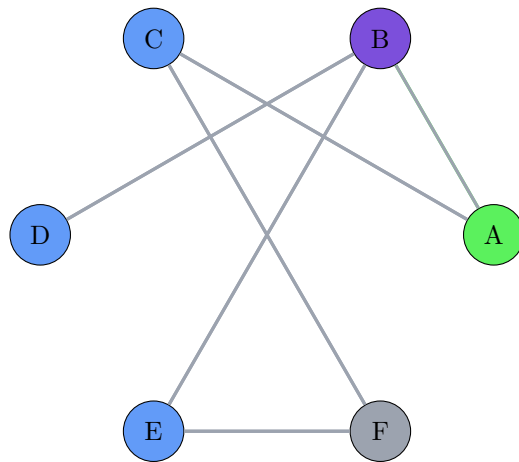

BFS

Log

Adding B's unvisited neighbors to the queue.

Graph

Queue

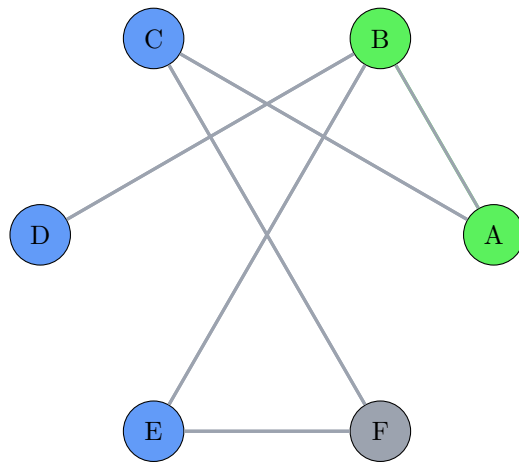

BFS

Log

Adding B's unvisited neighbors to the queue.

Graph

Queue

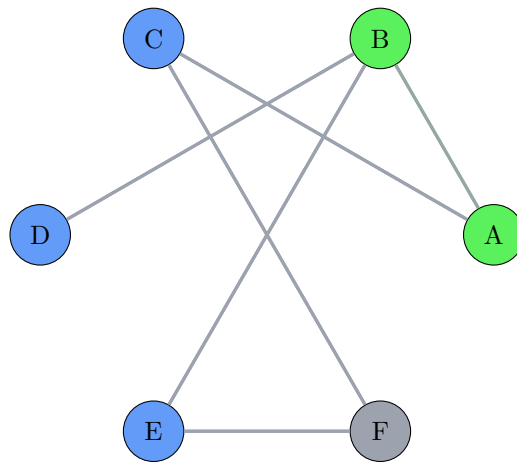

BFS

Log

Taking the first node from the queue.

Graph

Queue

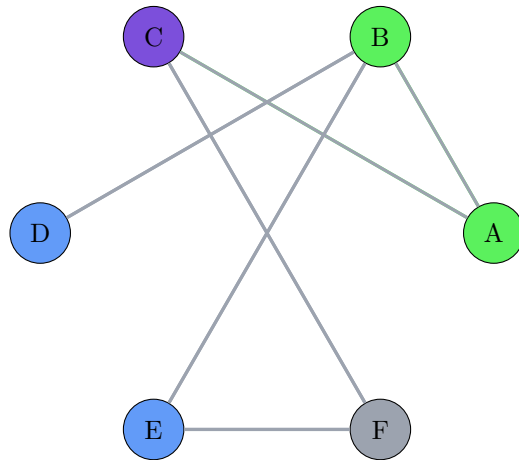

BFS

Log

Node C has not been visited yet | marking it visited.

Graph

Queue

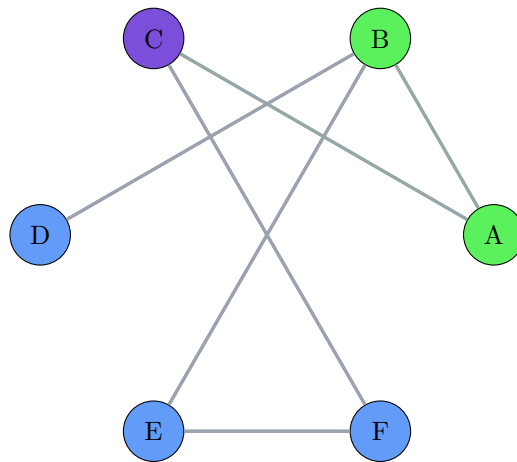

D	E
---	---

BFS

Log

Adding C's unvisited neighbors to the queue.

Graph

Queue

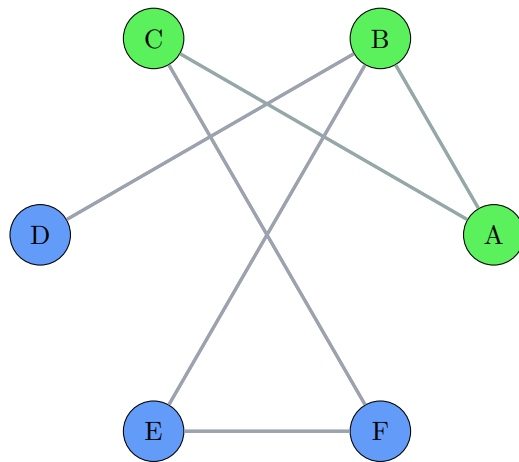

BFS

Log

Adding C's unvisited neighbors to the queue.

Graph

Queue

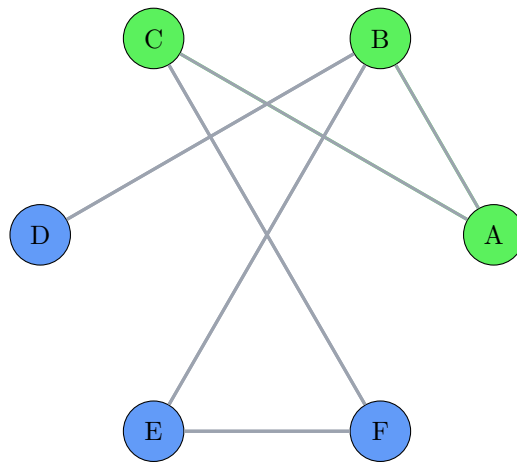

D	E	F
---	---	---

BFS

Log

Taking the first node from the queue.

Graph

Queue

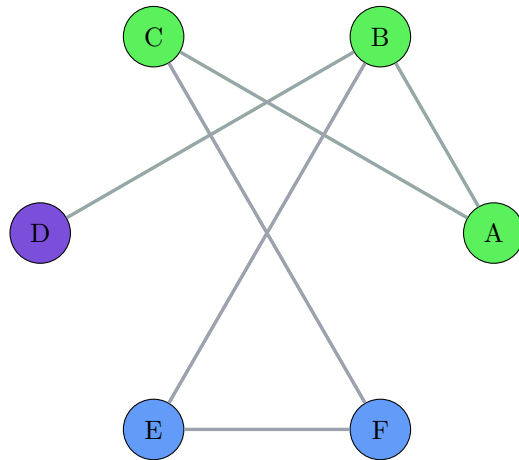

BFS

Log

Node D has not been visited yet | marking it visited.

Graph

Queue

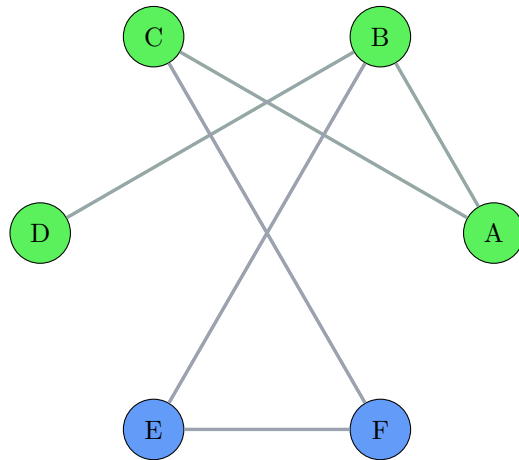

E	F
---	---

BFS

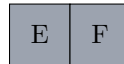

Log

Node D has not been visited yet | marking it visited.

Graph

Queue

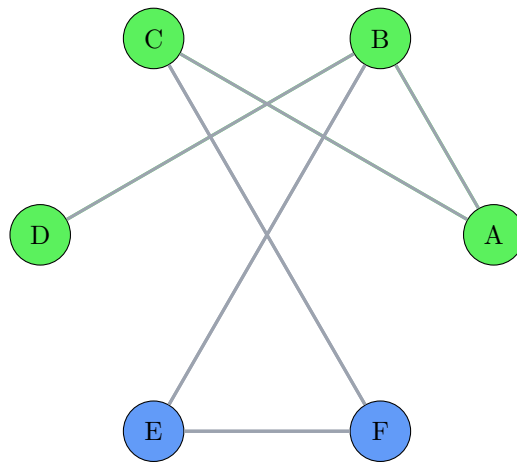

BFS

Log

Taking the first node from the queue.

Graph

Queue

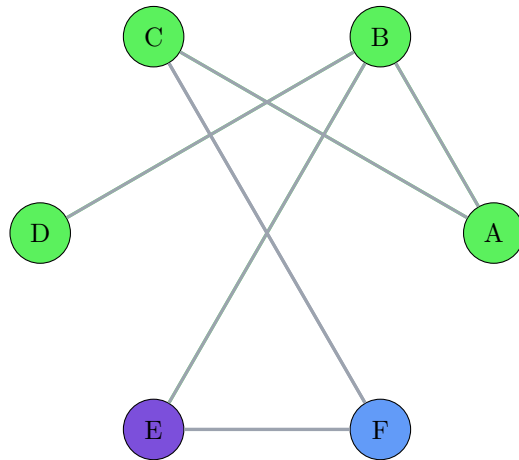

BFS

Log

Node E has not been visited yet | marking it visited.

Graph

Queue

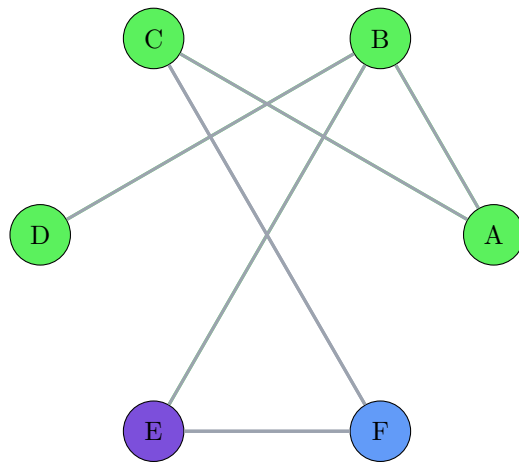

BFS

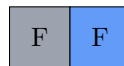

Log

Adding E's unvisited neighbors to the queue.

Graph

Queue

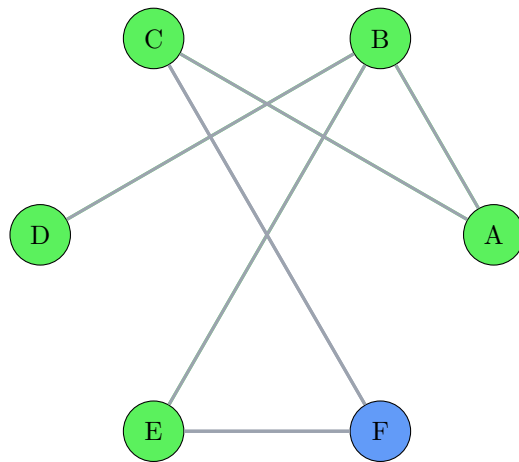

BFS

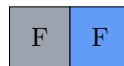

Log

Adding E's unvisited neighbors to the queue.

Graph

Queue

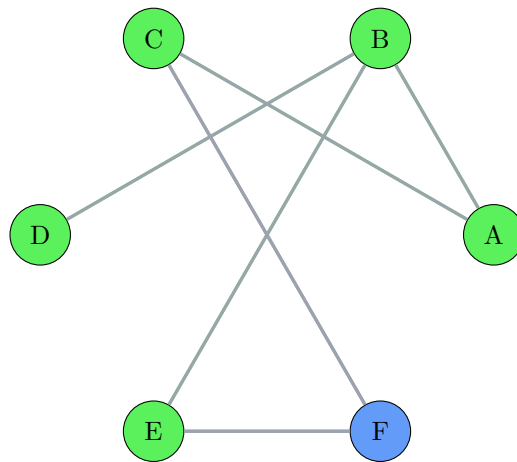

BFS

Log

Taking the first node from the queue.

Graph

Queue

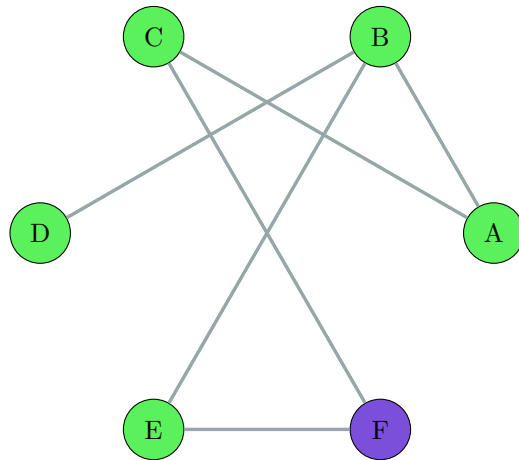

BFS

Log

Node F has not been visited yet | marking it visited.

Graph

Queue

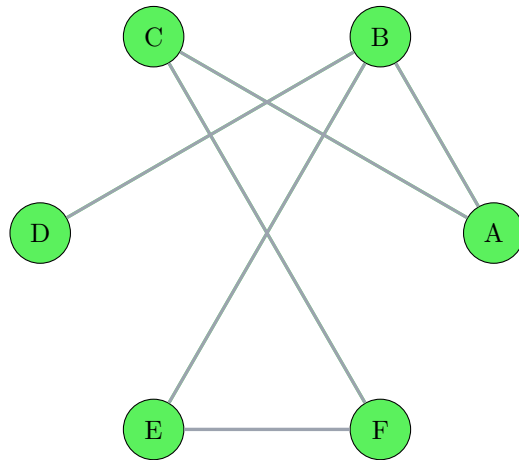

BFS

Log

Node F has not been visited yet | marking it visited.

Graph

Queue

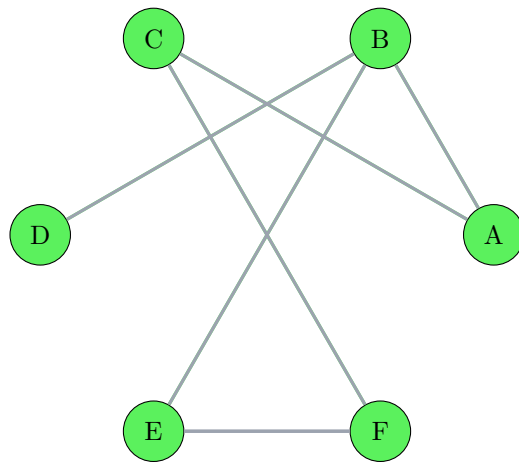

BFS

Log

Taking the first node from the queue.

Graph

Queue

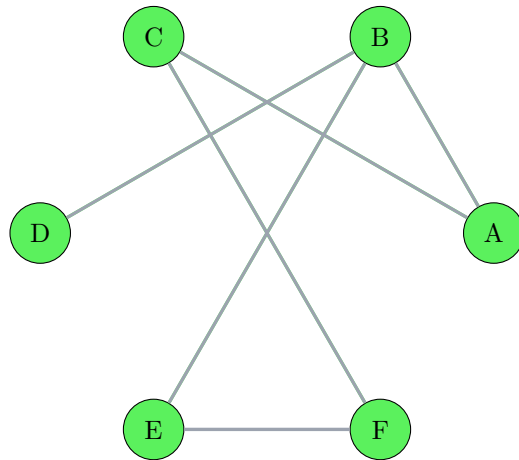

BFS

Log

Node F was already visited | skipping it.

Graph

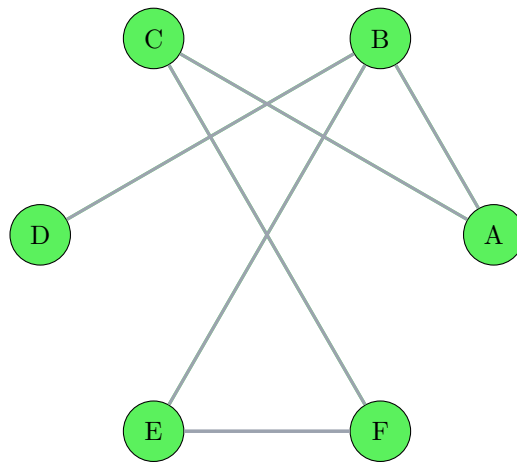

Queue

BFS

Log

Every reachable node has been visited.

Graph

Queue
