Chart

Insertion Sort

Log

Holding the value at index 1 (2) aside to insert it into the already-sorted section before it.

Chart

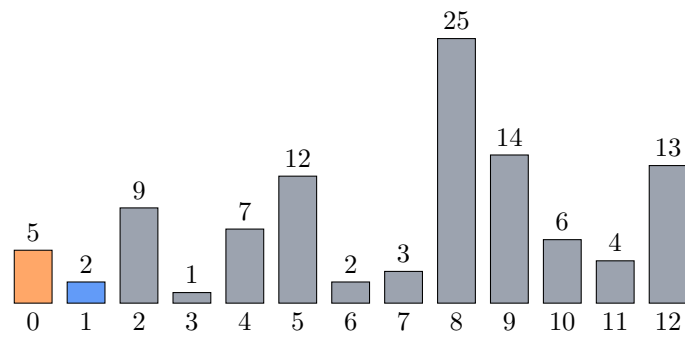

Insertion Sort

Log

The element at index 0 (5) is greater than the key, so it shifts one position right to make room.

Chart

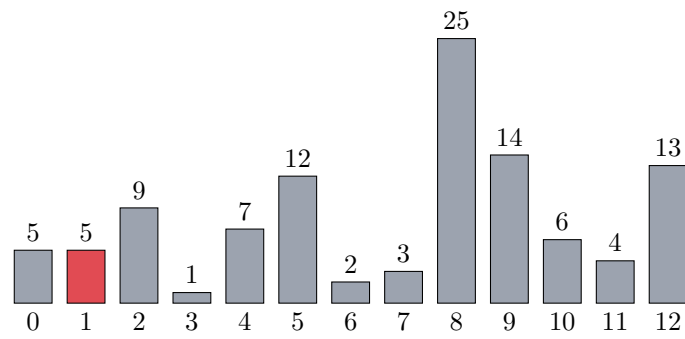

Insertion Sort

Log

The element at index 0 (5) is greater than the key, so it shifts one position right to make room.

Chart

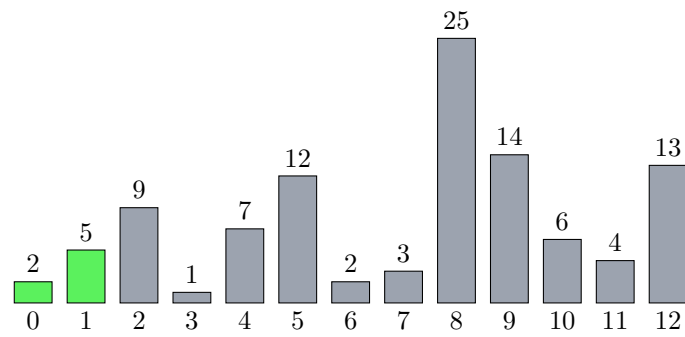

Insertion Sort

Log

No remaining element to the left is greater than the key, so it's placed at index 0.

Chart

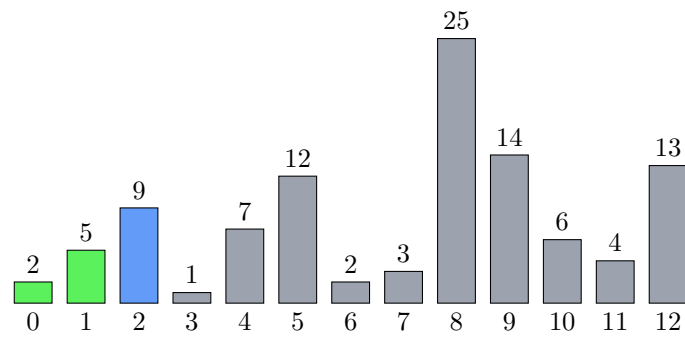

Insertion Sort

Log

Holding the value at index 2 (9) aside to insert it into the already-sorted section before it.

Chart

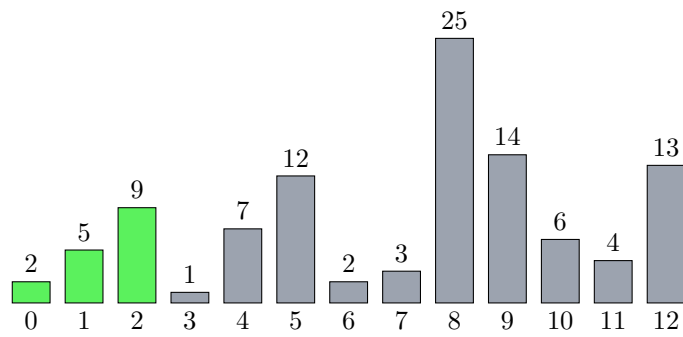

Insertion Sort

Log

No remaining element to the left is greater than the key, so it's placed at index 2.

Chart

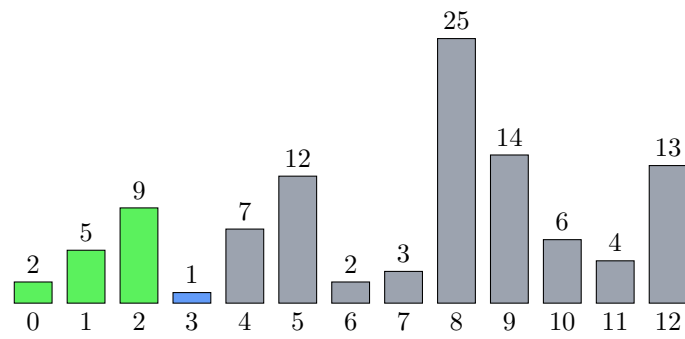

Insertion Sort

Log

Holding the value at index 3 (1) aside to insert it into the already-sorted section before it.

Chart

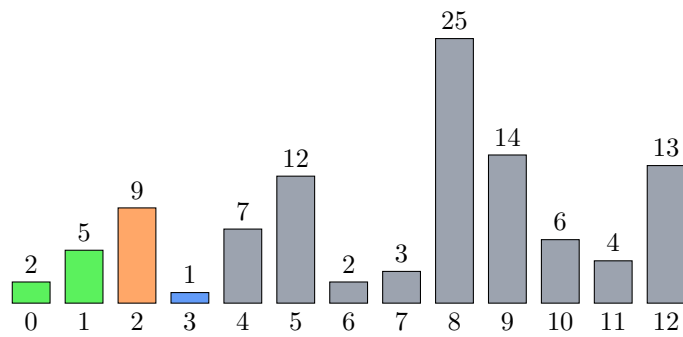

Insertion Sort

Log

The element at index 2 (9) is greater than the key, so it shifts one position right to make room.

Chart

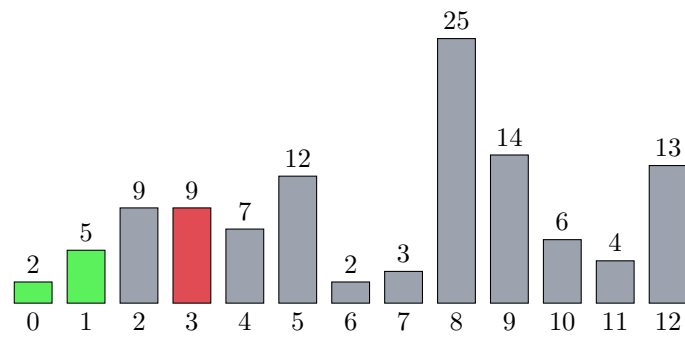

Insertion Sort

Log

The element at index 2 (9) is greater than the key, so it shifts one position right to make room.

Chart

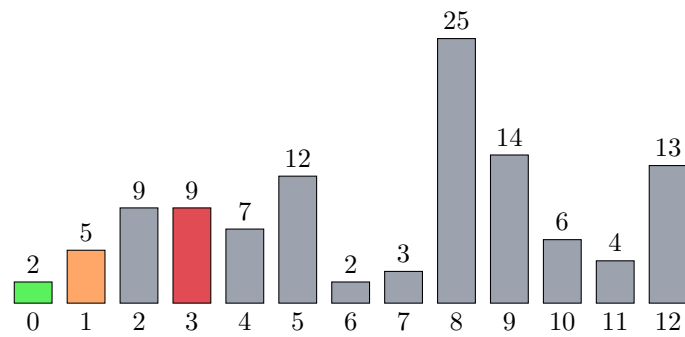

Insertion Sort

Log

The element at index 1 (5) is greater than the key, so it shifts one position right to make room.

Chart

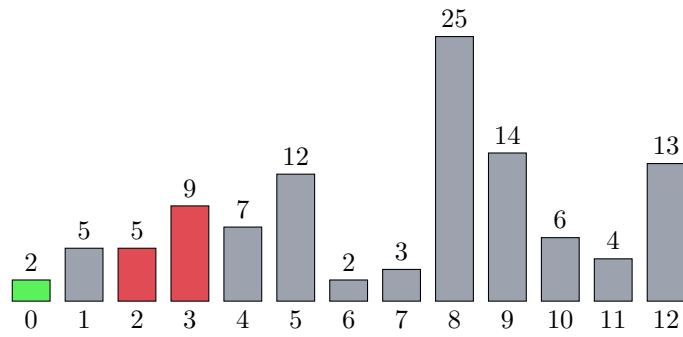

Insertion Sort

Log

The element at index 1 (5) is greater than the key, so it shifts one position right to make room.

Chart

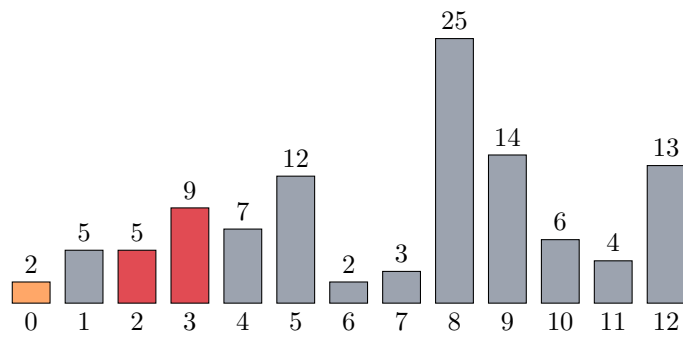

Insertion Sort

Log

The element at index 0 (2) is greater than the key, so it shifts one position right to make room.

Chart

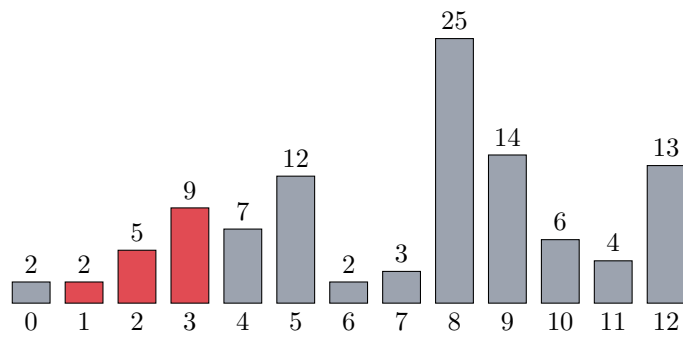

Insertion Sort

Log

The element at index 0 (2) is greater than the key, so it shifts one position right to make room.

Chart

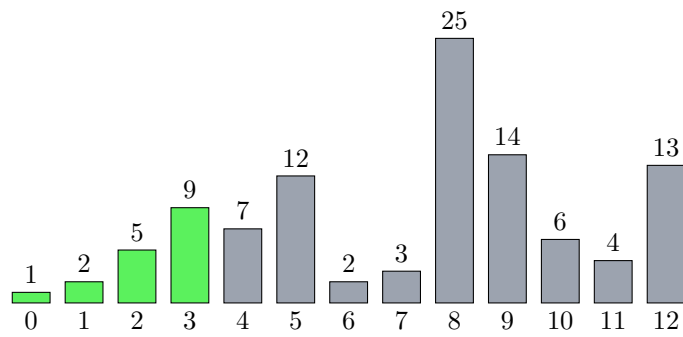

Insertion Sort

Log

No remaining element to the left is greater than the key, so it's placed at index 0.

Chart

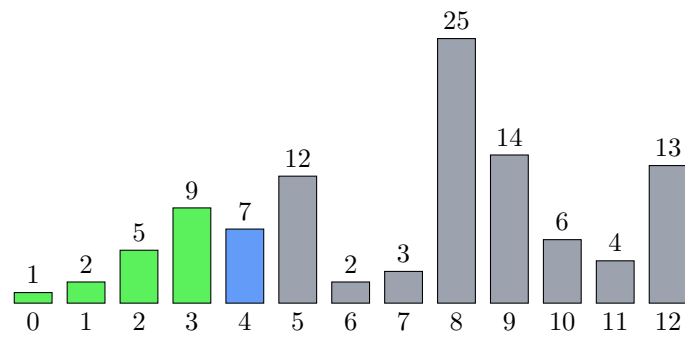

Insertion Sort

Log

Holding the value at index 4 (7) aside to insert it into the already-sorted section before it.

Chart

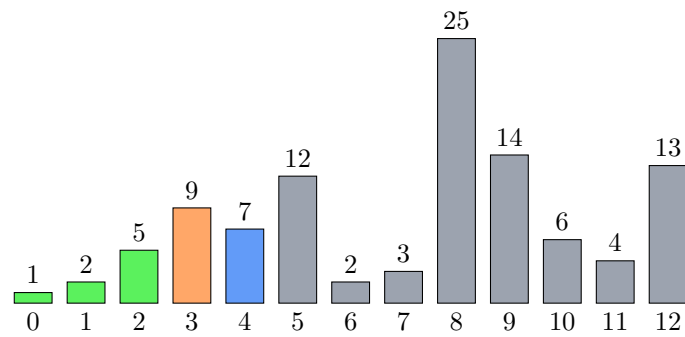

Insertion Sort

Log

The element at index 3 (9) is greater than the key, so it shifts one position right to make room.

Chart

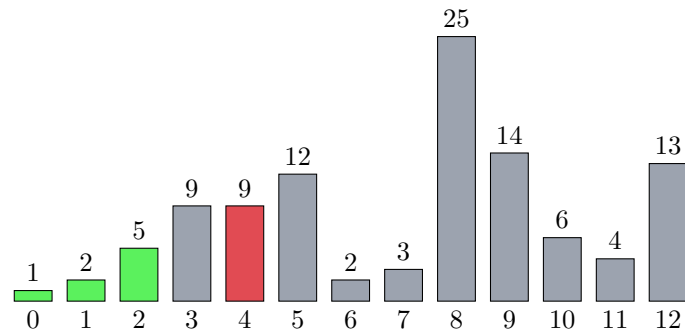

Insertion Sort

Log

The element at index 3 (9) is greater than the key, so it shifts one position right to make room.

Chart

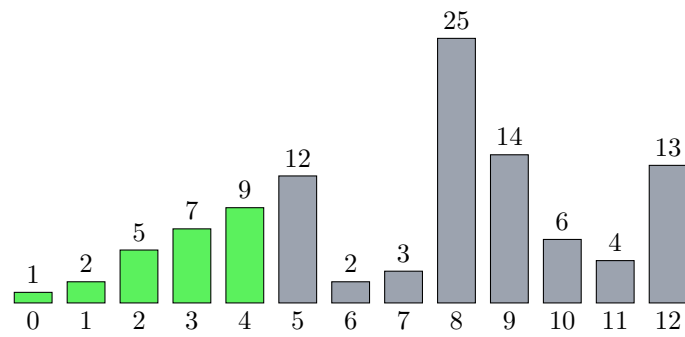

Insertion Sort

Log

No remaining element to the left is greater than the key, so it's placed at index 3.

Chart

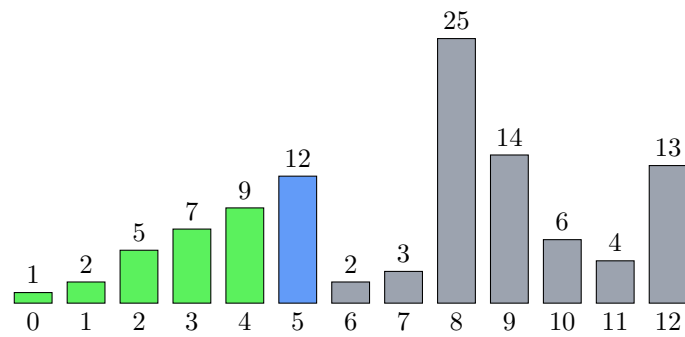

Insertion Sort

Log

Holding the value at index 5 (12) aside to insert it into the already-sorted section before it.

Chart

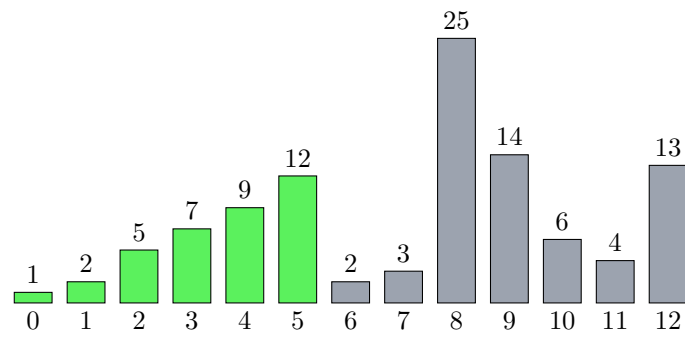

Insertion Sort

Log

No remaining element to the left is greater than the key, so it's placed at index 5.

Chart

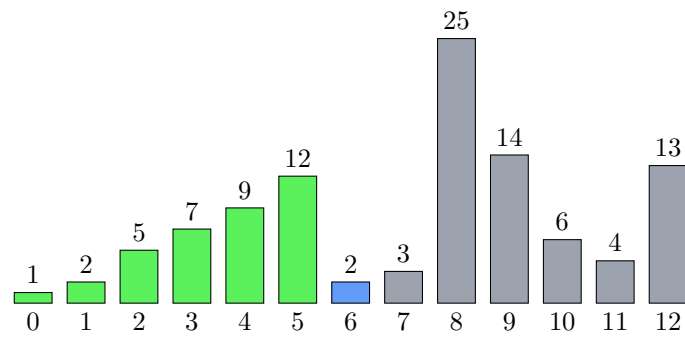

Insertion Sort

Log

Holding the value at index 6 (2) aside to insert it into the already-sorted section before it.

Chart

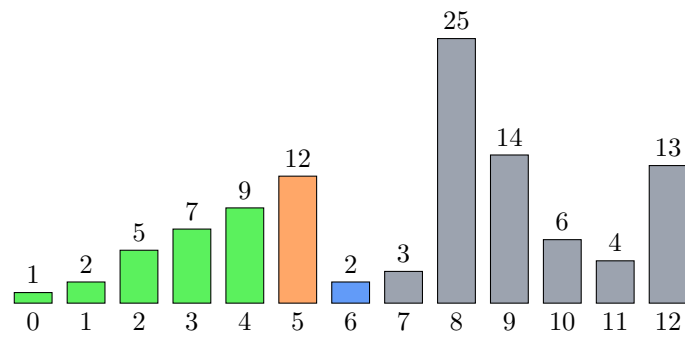

Insertion Sort

Log

The element at index 5 (12) is greater than the key, so it shifts one position right to make room.

Chart

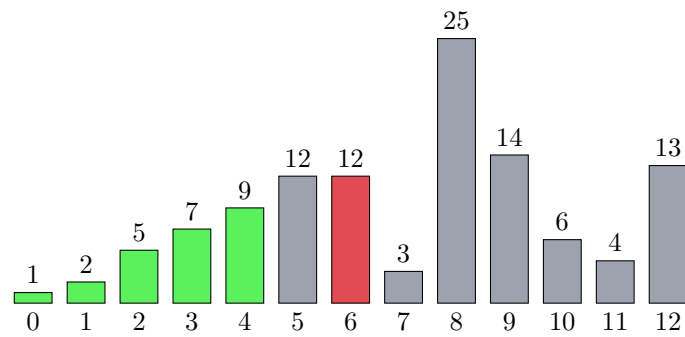

Insertion Sort

Log

The element at index 5 (12) is greater than the key, so it shifts one position right to make room.

Chart

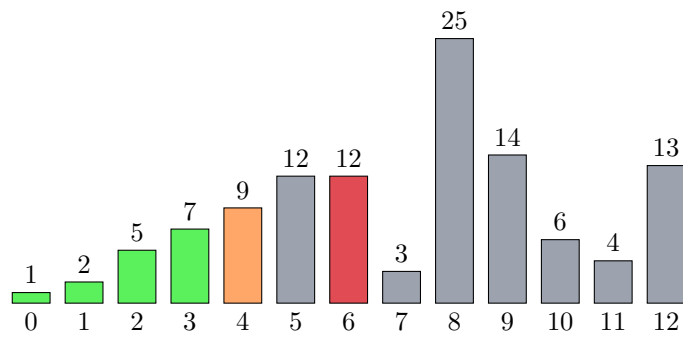

Insertion Sort

Log

The element at index 4 (9) is greater than the key, so it shifts one position right to make room.

Chart

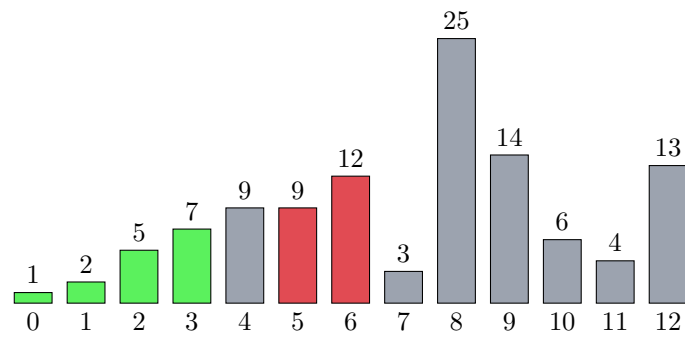

Insertion Sort

Log

The element at index 4 (9) is greater than the key, so it shifts one position right to make room.

Chart

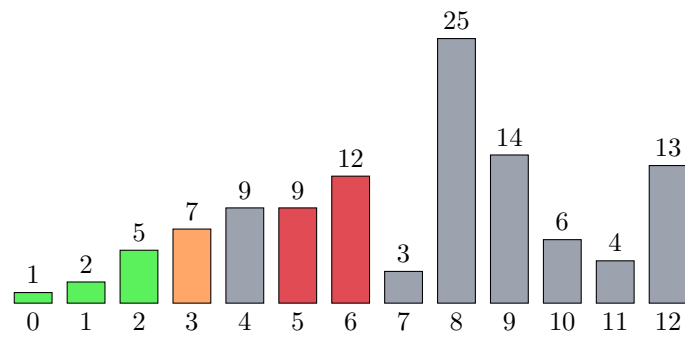

Insertion Sort

Log

The element at index 3 (7) is greater than the key, so it shifts one position right to make room.

Chart

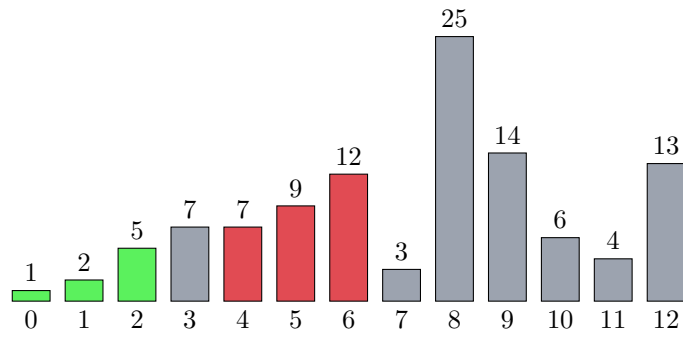

Insertion Sort

Log

The element at index 3 (7) is greater than the key, so it shifts one position right to make room.

Chart

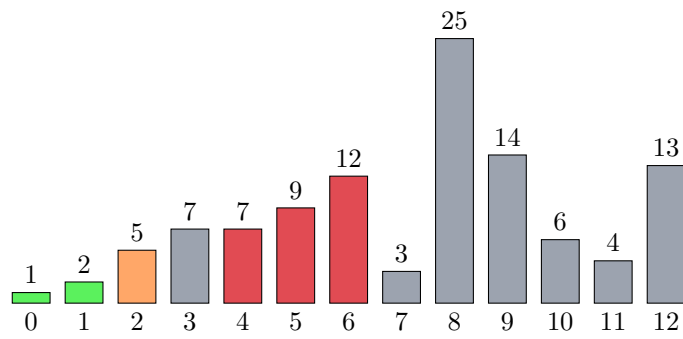

Insertion Sort

Log

The element at index 2 (5) is greater than the key, so it shifts one position right to make room.

Chart

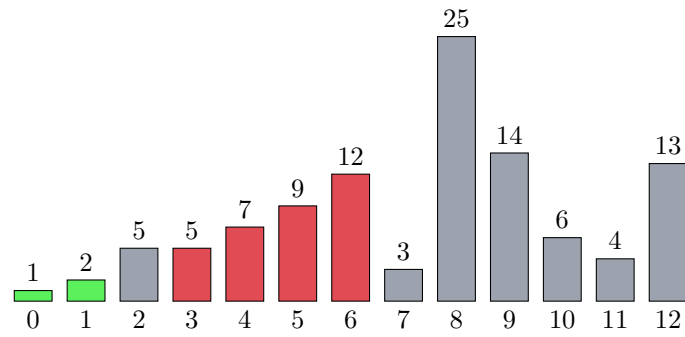

Insertion Sort

Log

The element at index 2 (5) is greater than the key, so it shifts one position right to make room.

Chart

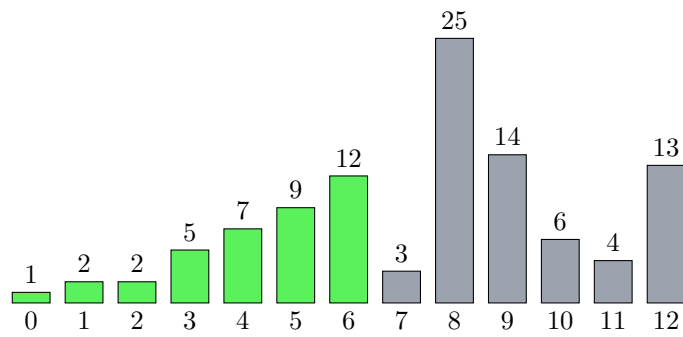

Insertion Sort

Log

No remaining element to the left is greater than the key, so it's placed at index 2.

Chart

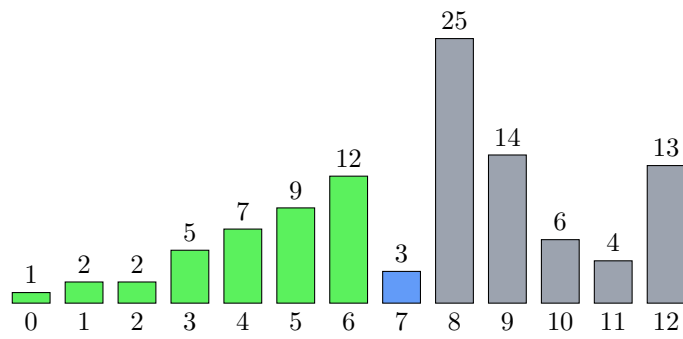

Insertion Sort

Log

Holding the value at index 7 (3) aside to insert it into the already-sorted section before it.

Chart

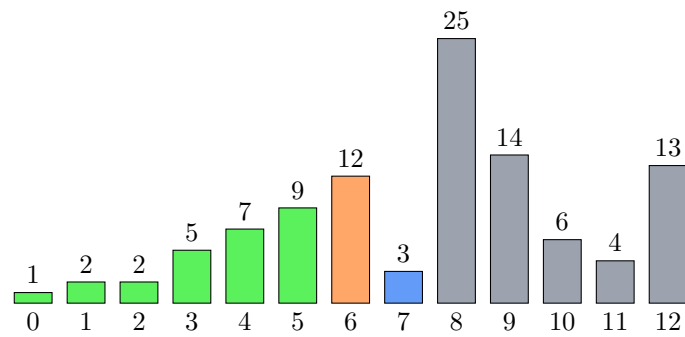

Insertion Sort

Log

The element at index 6 (12) is greater than the key, so it shifts one position right to make room.

Chart

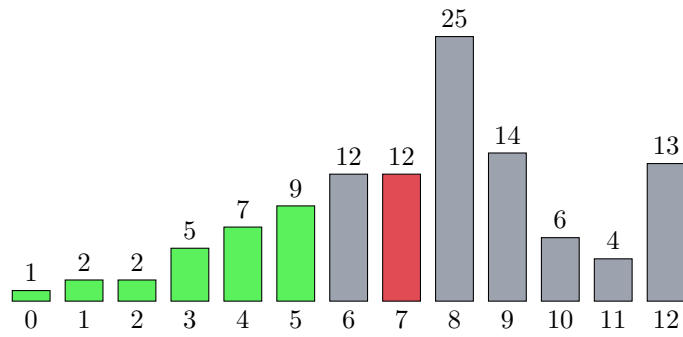

Insertion Sort

Log

The element at index 6 (12) is greater than the key, so it shifts one position right to make room.

Chart

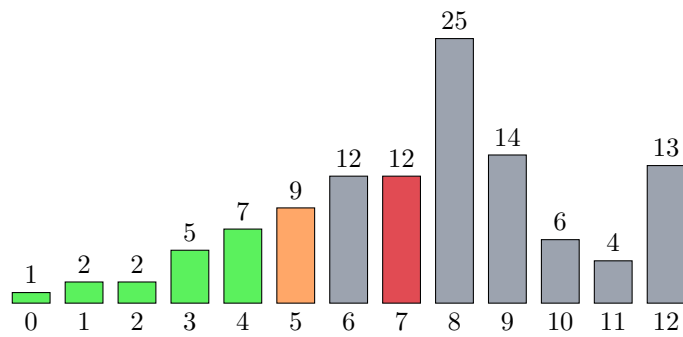

Insertion Sort

Log

The element at index 5 (9) is greater than the key, so it shifts one position right to make room.

Chart

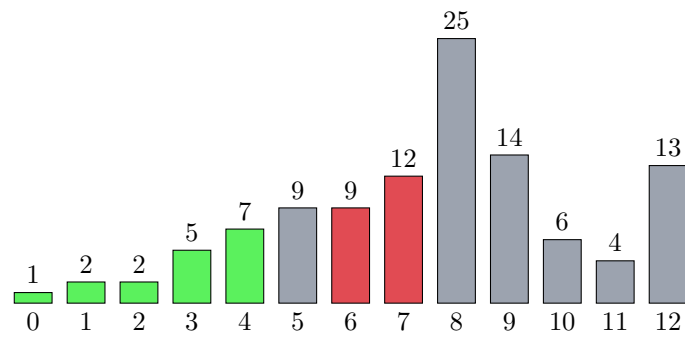

Insertion Sort

Log

The element at index 5 (9) is greater than the key, so it shifts one position right to make room.

Chart

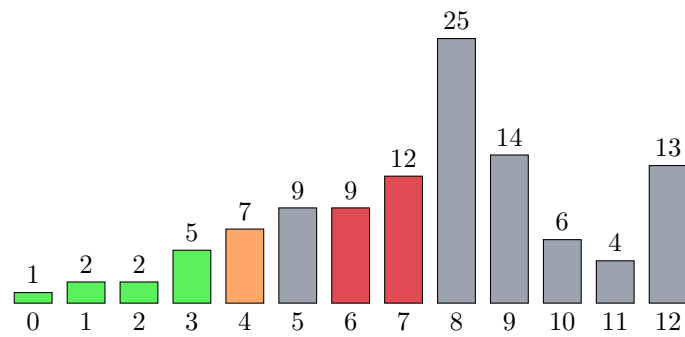

Insertion Sort

Log

The element at index 4 (7) is greater than the key, so it shifts one position right to make room.

Chart

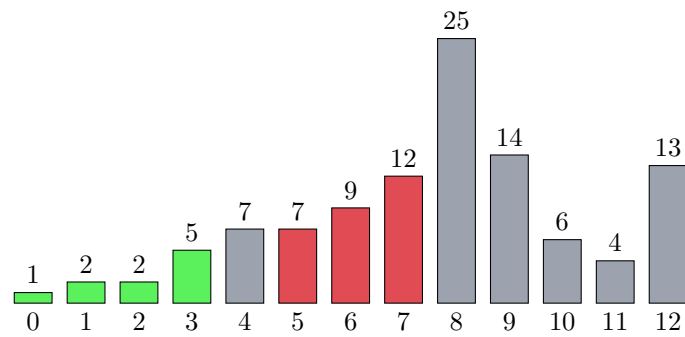

Insertion Sort

Log

The element at index 4 (7) is greater than the key, so it shifts one position right to make room.

Chart

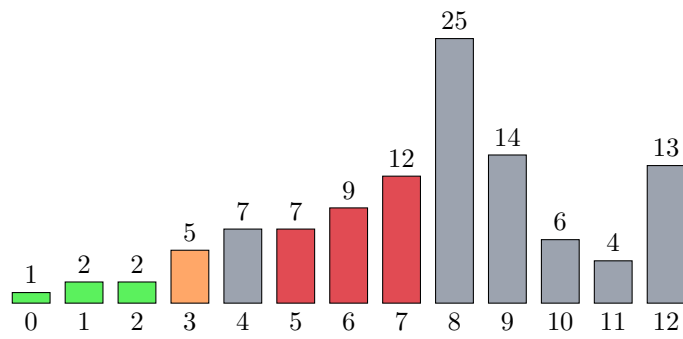

Insertion Sort

Log

The element at index 3 (5) is greater than the key, so it shifts one position right to make room.

Chart

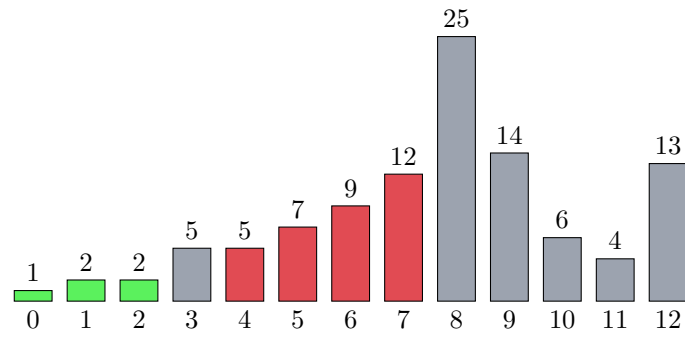

Insertion Sort

Log

The element at index 3 (5) is greater than the key, so it shifts one position right to make room.

Chart

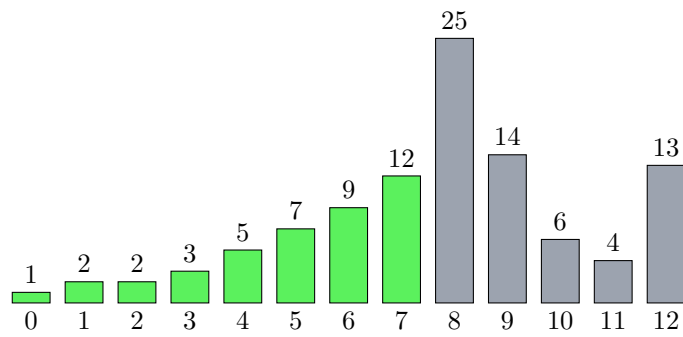

Insertion Sort

Log

No remaining element to the left is greater than the key, so it's placed at index 3.

Chart

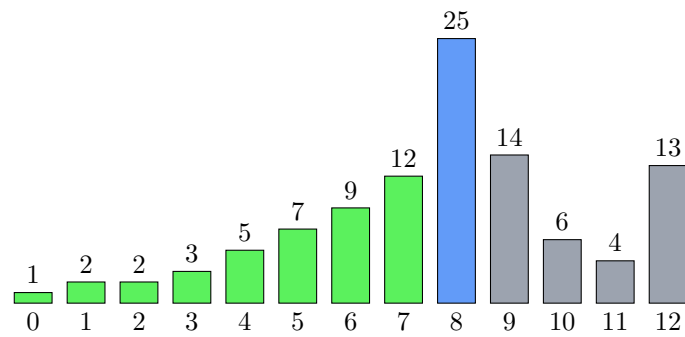

Insertion Sort

Log

Holding the value at index 8 (25) aside to insert it into the already-sorted section before it.

Chart

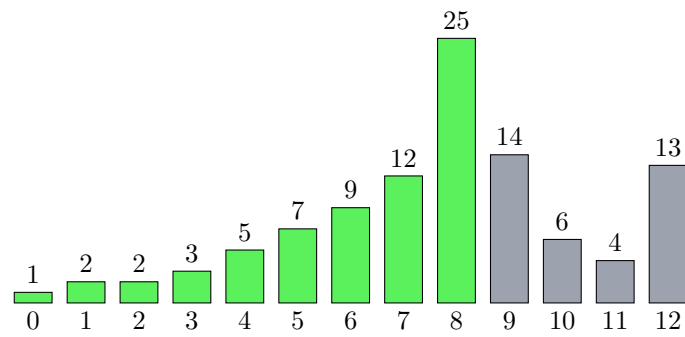

Insertion Sort

Log

No remaining element to the left is greater than the key, so it's placed at index 8.

Chart

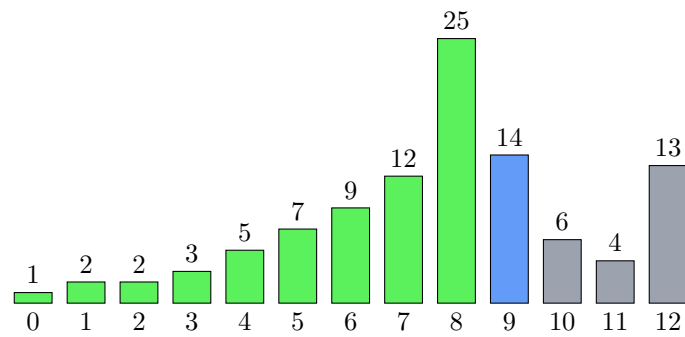

Insertion Sort

Log

Holding the value at index 9 (14) aside to insert it into the already-sorted section before it.

Chart

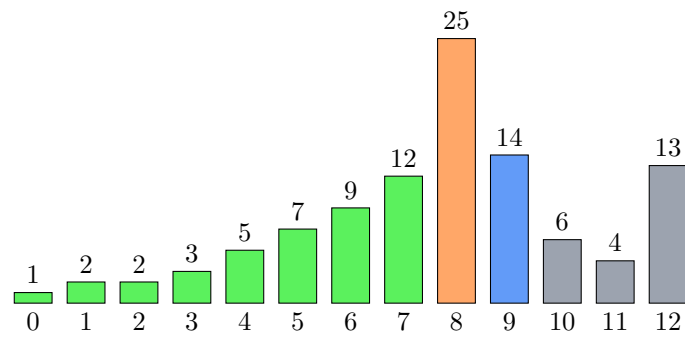

Insertion Sort

Log

The element at index 8 (25) is greater than the key, so it shifts one position right to make room.

Chart

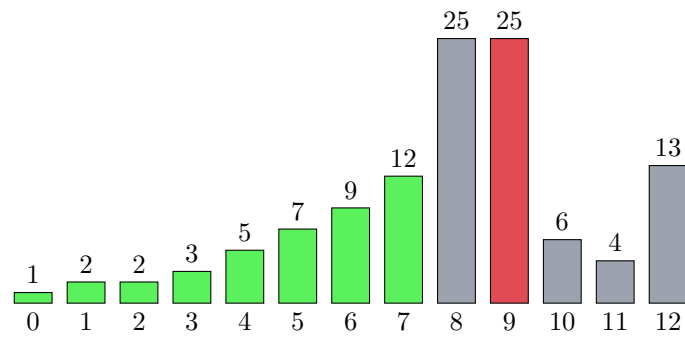

Insertion Sort

Log

The element at index 8 (25) is greater than the key, so it shifts one position right to make room.

Chart

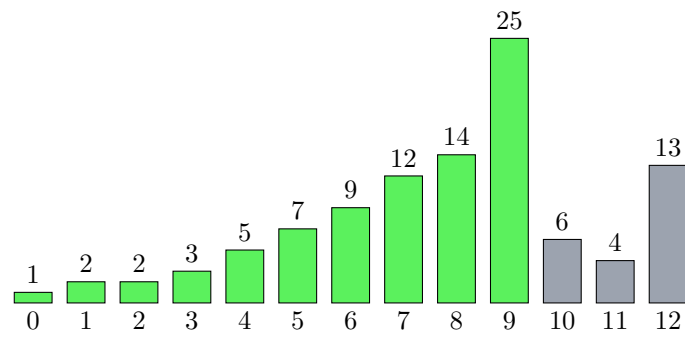

Insertion Sort

Log

No remaining element to the left is greater than the key, so it's placed at index 8.

Chart

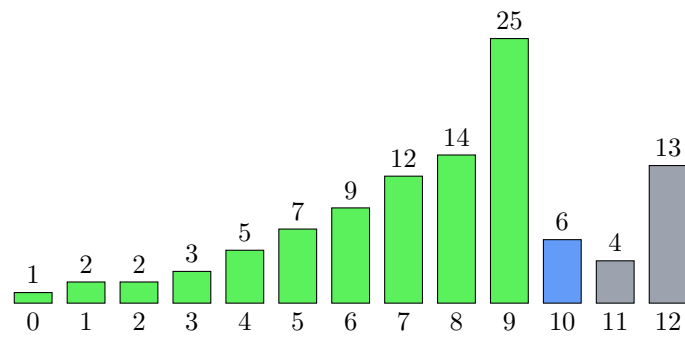

Insertion Sort

Log

Holding the value at index 10 (6) aside to insert it into the already-sorted section before it.

Chart

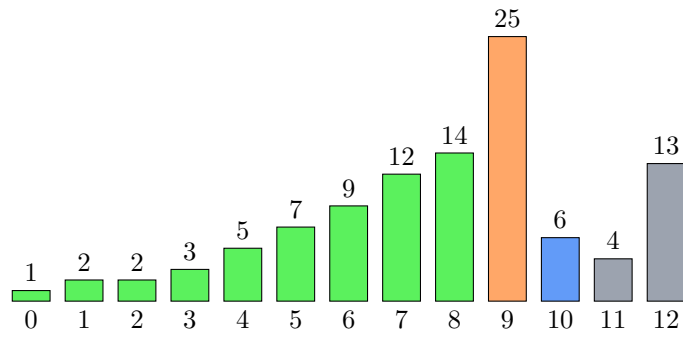

Insertion Sort

Log

The element at index 9 (25) is greater than the key, so it shifts one position right to make room.

Chart

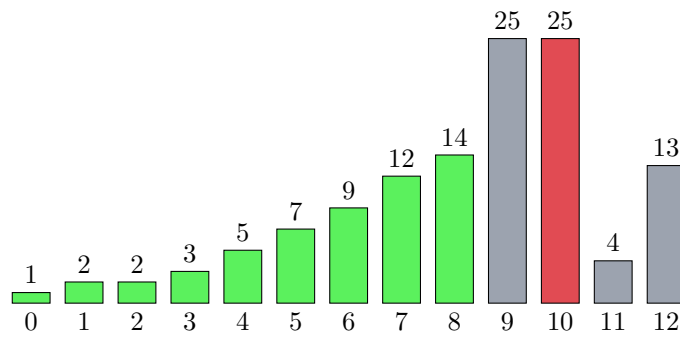

Insertion Sort

Log

The element at index 9 (25) is greater than the key, so it shifts one position right to make room.

Chart

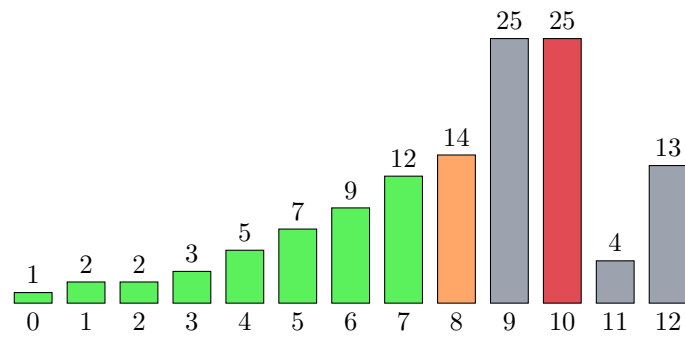

Insertion Sort

Log

The element at index 8 (14) is greater than the key, so it shifts one position right to make room.

Chart

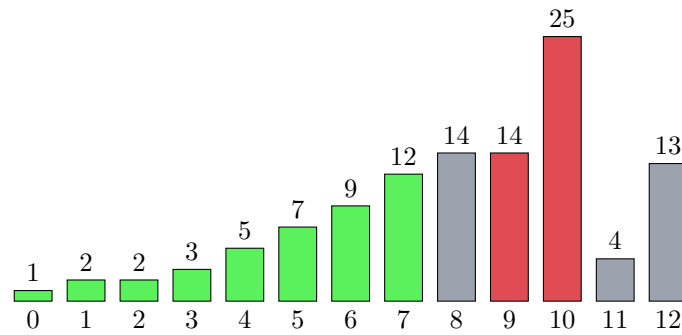

Insertion Sort

Log

The element at index 8 (14) is greater than the key, so it shifts one position right to make room.

Chart

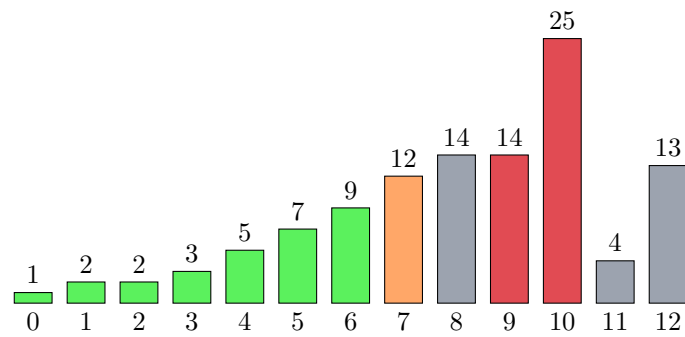

Insertion Sort

Log

The element at index 7 (12) is greater than the key, so it shifts one position right to make room.

Chart

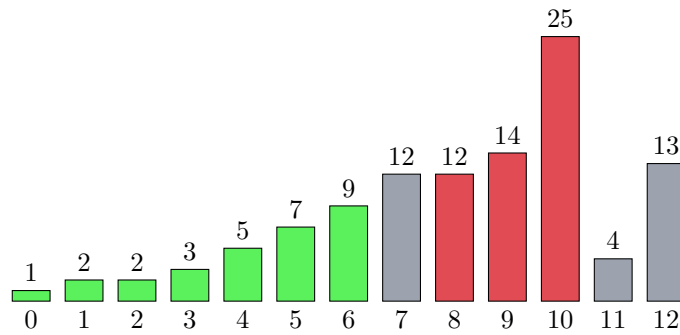

Insertion Sort

Log

The element at index 7 (12) is greater than the key, so it shifts one position right to make room.

Chart

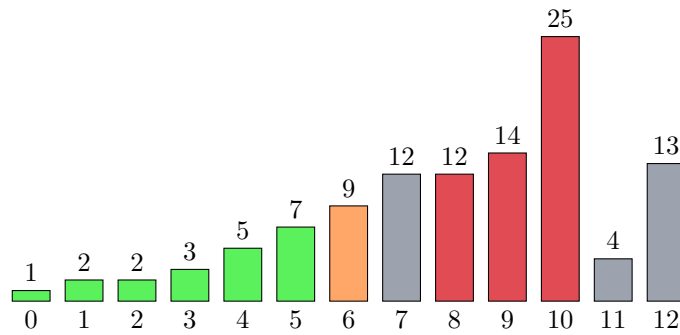

Insertion Sort

Log

The element at index 6 (9) is greater than the key, so it shifts one position right to make room.

Chart

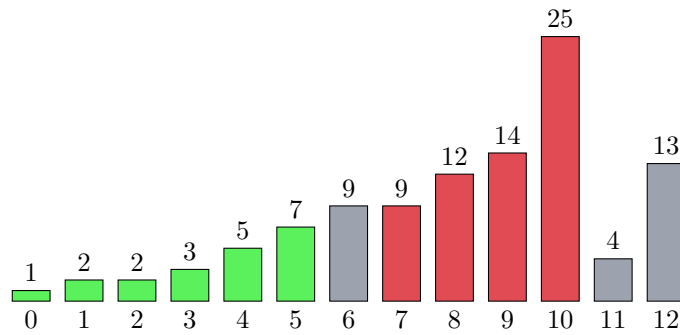

Insertion Sort

Log

The element at index 6 (9) is greater than the key, so it shifts one position right to make room.

Chart

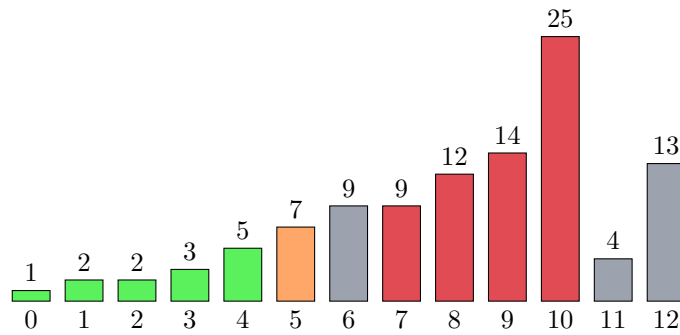

Insertion Sort

Log

The element at index 5 (7) is greater than the key, so it shifts one position right to make room.

Chart

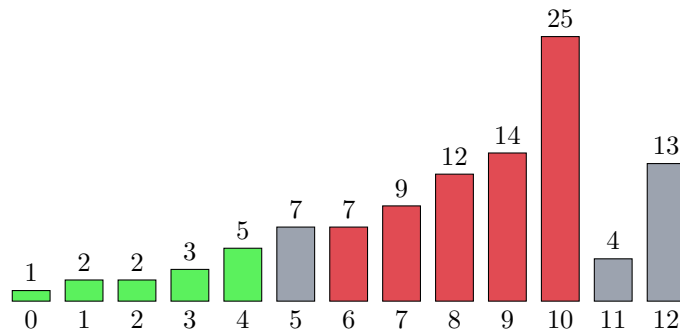

Insertion Sort

Log

The element at index 5 (7) is greater than the key, so it shifts one position right to make room.

Chart

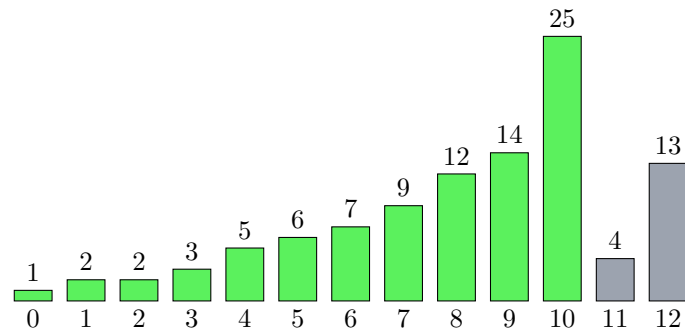

Insertion Sort

Log

No remaining element to the left is greater than the key, so it's placed at index 5.

Chart

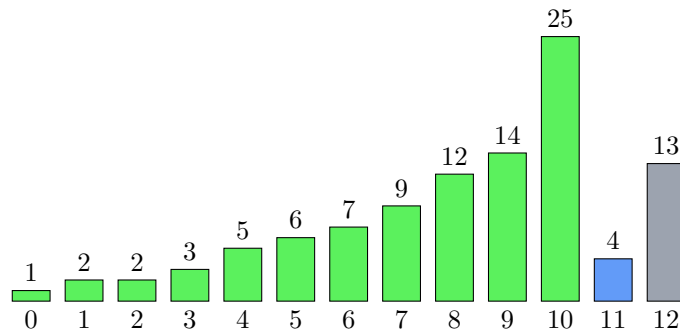

Insertion Sort

Log

Holding the value at index 11 (4) aside to insert it into the already-sorted section before it.

Chart

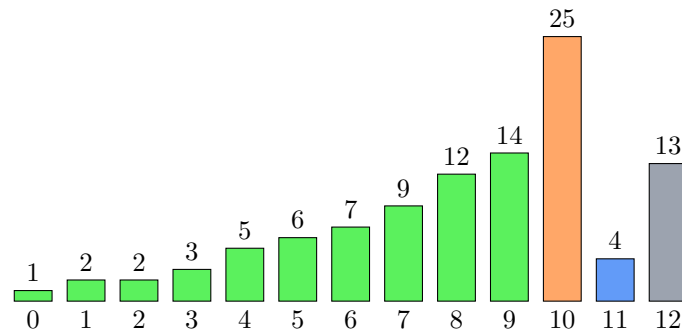

Insertion Sort

Log

The element at index 10 (25) is greater than the key, so it shifts one position right to make room.

Chart

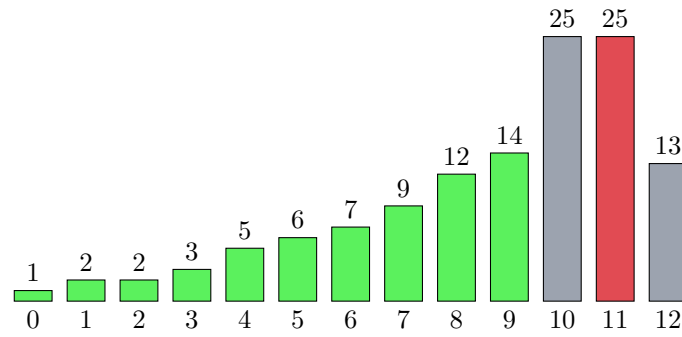

Insertion Sort

Log

The element at index 10 (25) is greater than the key, so it shifts one position right to make room.

Chart

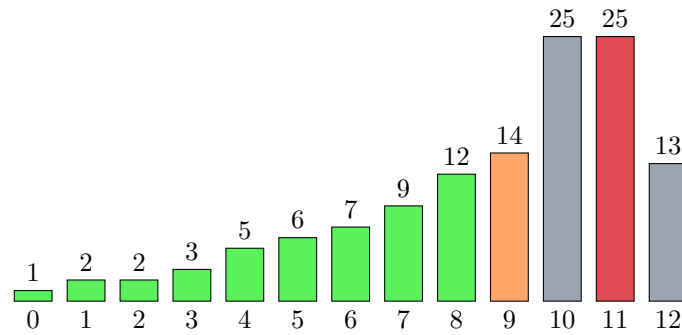

Insertion Sort

Log

The element at index 9 (14) is greater than the key, so it shifts one position right to make room.

Chart

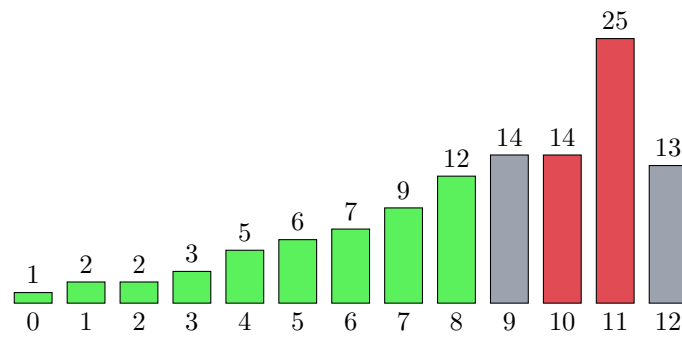

Insertion Sort

Log

The element at index 9 (14) is greater than the key, so it shifts one position right to make room.

Chart

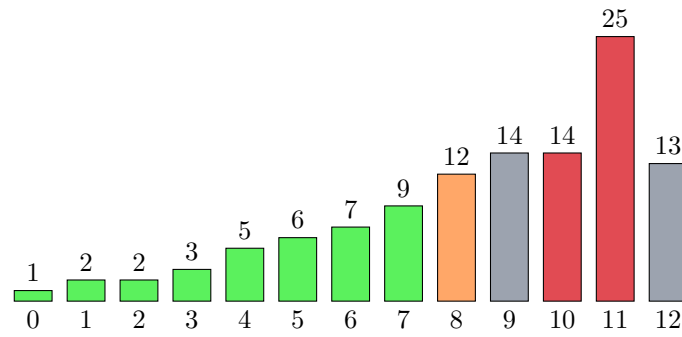

Insertion Sort

Log

The element at index 8 (12) is greater than the key, so it shifts one position right to make room.

Chart

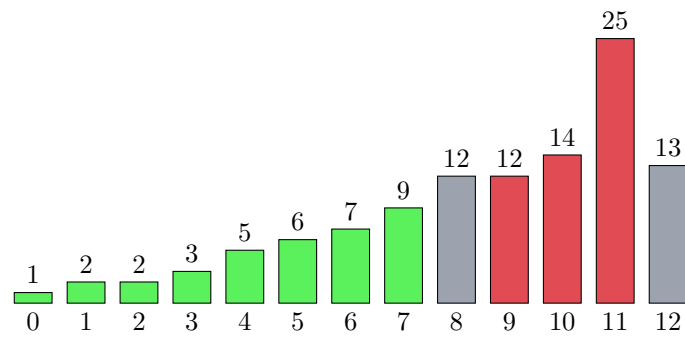

Insertion Sort

Log

The element at index 8 (12) is greater than the key, so it shifts one position right to make room.

Chart

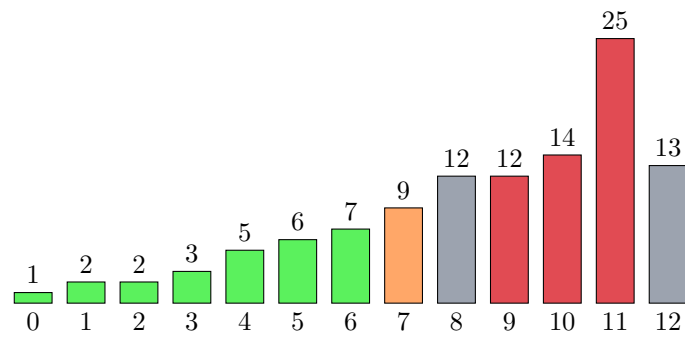

Insertion Sort

Log

The element at index 7 (9) is greater than the key, so it shifts one position right to make room.

Chart

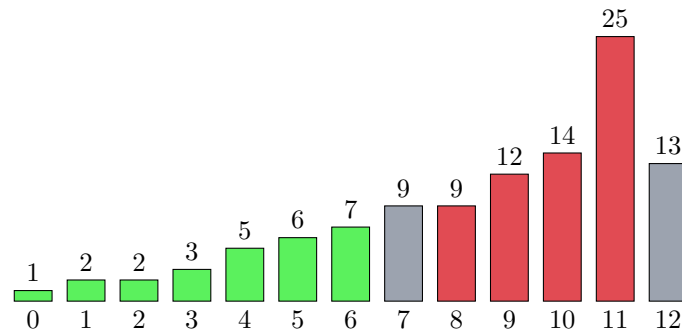

Insertion Sort

Log

The element at index 7 (9) is greater than the key, so it shifts one position right to make room.

Chart

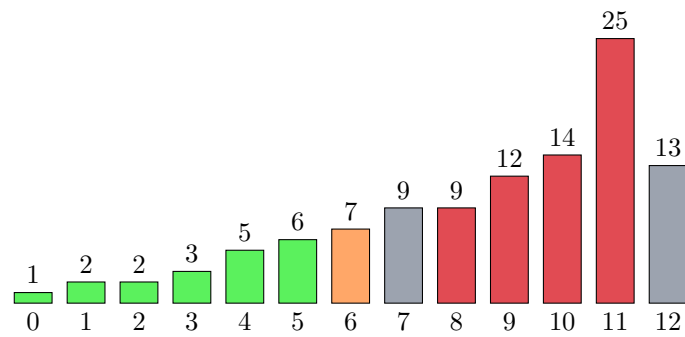

Insertion Sort

Log

The element at index 6 (7) is greater than the key, so it shifts one position right to make room.

Chart

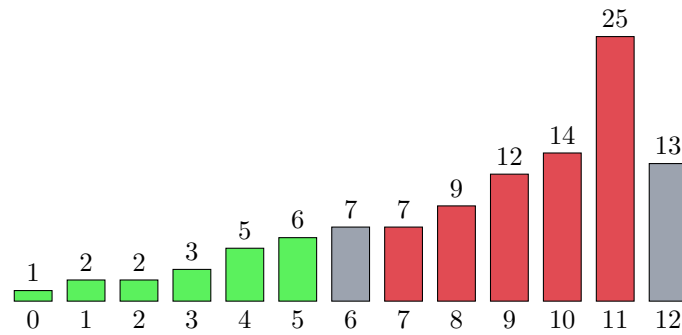

Insertion Sort

Log

The element at index 6 (7) is greater than the key, so it shifts one position right to make room.

Chart

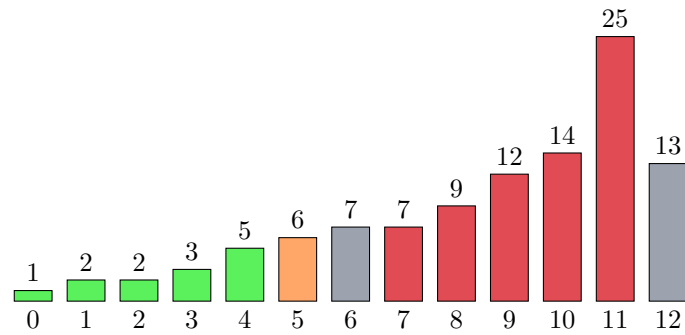

Insertion Sort

Log

The element at index 5 (6) is greater than the key, so it shifts one position right to make room.

Chart

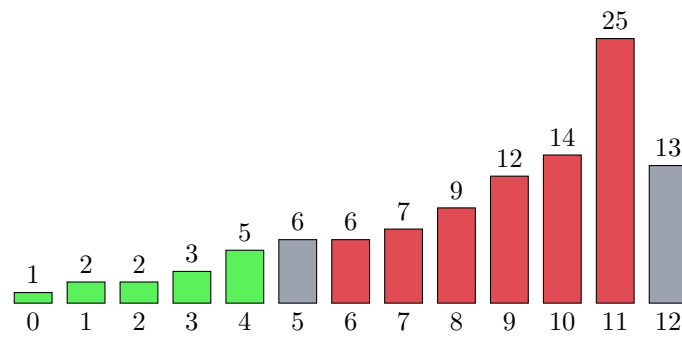

Insertion Sort

Log

The element at index 5 (6) is greater than the key, so it shifts one position right to make room.

Chart

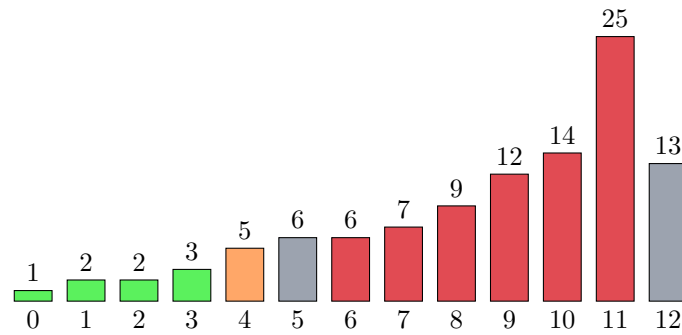

Insertion Sort

Log

The element at index 4 (5) is greater than the key, so it shifts one position right to make room.

Chart

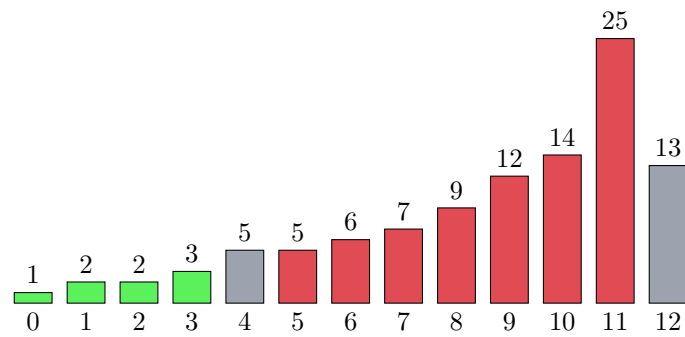

Insertion Sort

Log

The element at index 4 (5) is greater than the key, so it shifts one position right to make room.

Chart

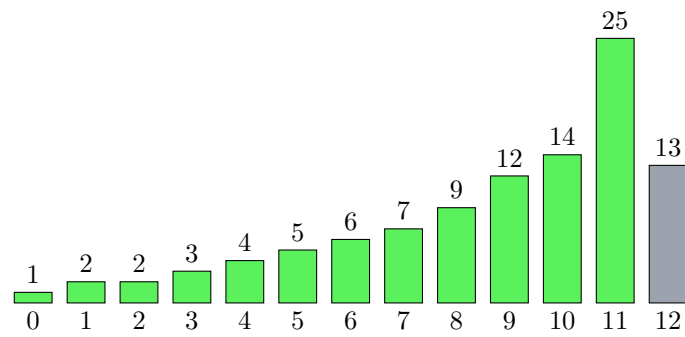

Insertion Sort

Log

No remaining element to the left is greater than the key, so it's placed at index 4.

Chart

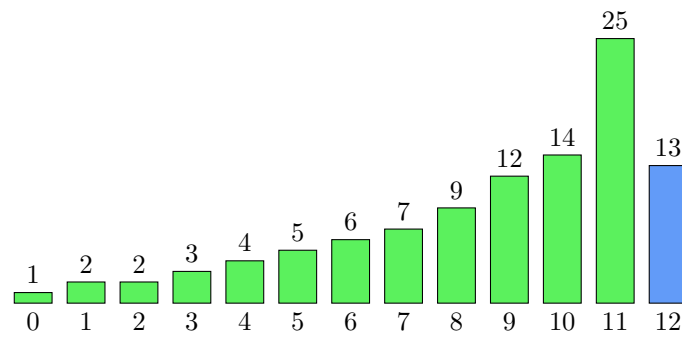

Insertion Sort

Log

Holding the value at index 12 (13) aside to insert it into the already-sorted section before it.

Chart

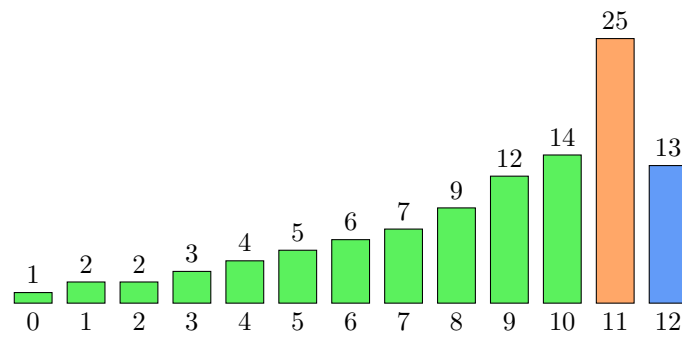

Insertion Sort

Log

The element at index 11 (25) is greater than the key, so it shifts one position right to make room.

Chart

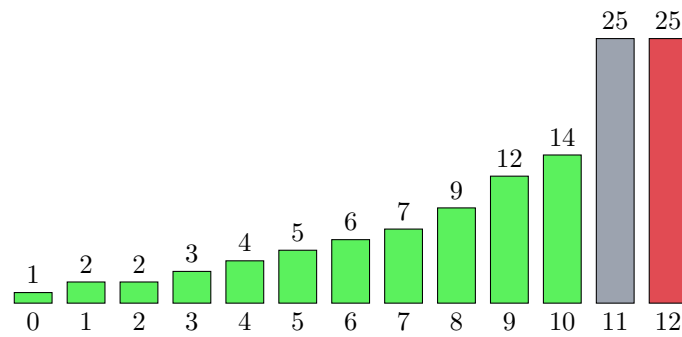

Insertion Sort

Log

The element at index 11 (25) is greater than the key, so it shifts one position right to make room.

Chart

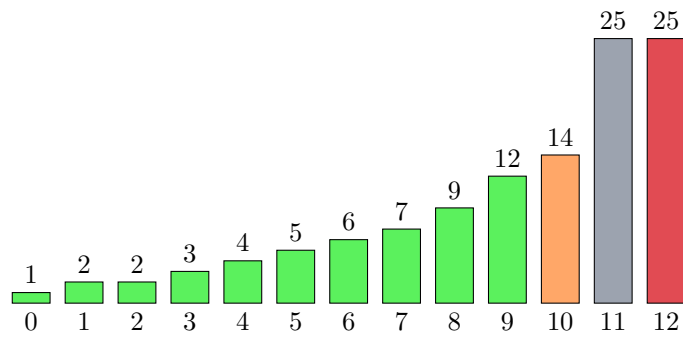

Insertion Sort

Log

The element at index 10 (14) is greater than the key, so it shifts one position right to make room.

Chart

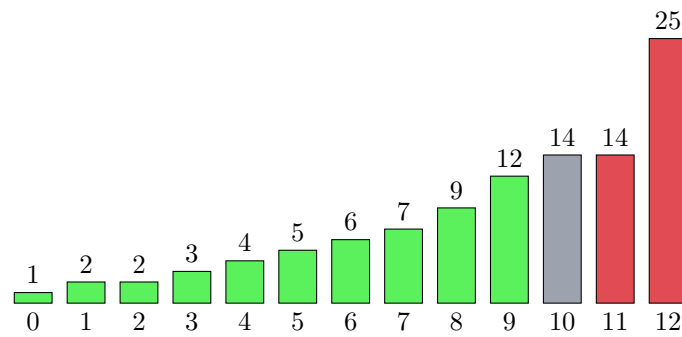

Insertion Sort

Log

The element at index 10 (14) is greater than the key, so it shifts one position right to make room.

Chart

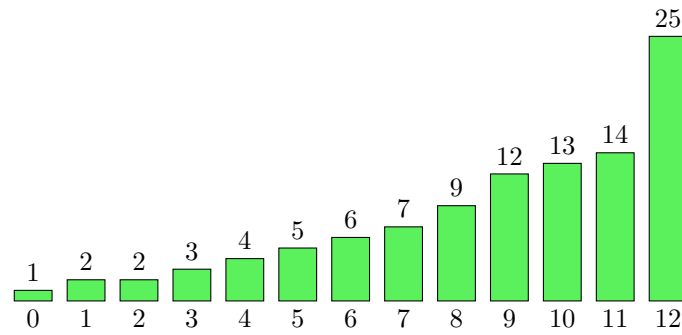

Insertion Sort

Log

No remaining element to the left is greater than the key, so it's placed at index 10.

Chart

Insertion Sort

Log

Every element has been inserted into its correct position | the array is fully sorted.
