Chart

Selection Sort

Log

Looking for the smallest remaining value to place at index 0.

Chart

Selection Sort

Log

Comparing the element at index 1 against the smallest value found so far (index 0, value 5).

Chart

Selection Sort

Log

Element at index 1 is smaller than the previous minimum | it becomes the new smallest value found this

Chart

Selection Sort

Log

Comparing the element at index 2 against the smallest value found so far (index 1, value 2).

Chart

Selection Sort

Log

Comparing the element at index 2 against the smallest value found so far (index 1, value 2).

Chart

Selection Sort

Log

Comparing the element at index 3 against the smallest value found so far (index 1, value 2).

Chart

Selection Sort

Log

Element at index 3 is smaller than the previous minimum | it becomes the new smallest value found this

Chart

Selection Sort

Log

Comparing the element at index 4 against the smallest value found so far (index 3, value 1).

Chart

Selection Sort

Log

Comparing the element at index 4 against the smallest value found so far (index 3, value 1).

Chart

Selection Sort

Log

Comparing the element at index 5 against the smallest value found so far (index 3, value 1).

Chart

Selection Sort

Log

Comparing the element at index 5 against the smallest value found so far (index 3, value 1).

Chart

Selection Sort

Log

Comparing the element at index 6 against the smallest value found so far (index 3, value 1).

Chart

Selection Sort

Log

Comparing the element at index 6 against the smallest value found so far (index 3, value 1).

Chart

Selection Sort

Log

Comparing the element at index 7 against the smallest value found so far (index 3, value 1).

Chart

Selection Sort

Log

Comparing the element at index 7 against the smallest value found so far (index 3, value 1).

Chart

Selection Sort

Log

Comparing the element at index 8 against the smallest value found so far (index 3, value 1).

Chart

Selection Sort

Log

Comparing the element at index 8 against the smallest value found so far (index 3, value 1).

Chart

Selection Sort

Log

Comparing the element at index 9 against the smallest value found so far (index 3, value 1).

Chart

Selection Sort

Log

Comparing the element at index 9 against the smallest value found so far (index 3, value 1).

Chart

Selection Sort

Log

Comparing the element at index 10 against the smallest value found so far (index 3, value 1).

Chart

Selection Sort

Log

Comparing the element at index 10 against the smallest value found so far (index 3, value 1).

Chart

Selection Sort

Log

Comparing the element at index 11 against the smallest value found so far (index 3, value 1).

Chart

Selection Sort

Log

Comparing the element at index 11 against the smallest value found so far (index 3, value 1).

Chart

Selection Sort

Log

Comparing the element at index 12 against the smallest value found so far (index 3, value 1).

Chart

Selection Sort

Log

Comparing the element at index 12 against the smallest value found so far (index 3, value 1).

Chart

Selection Sort

Log

The smallest remaining value was found at index 3 | swapping it into index 0.

Chart

Selection Sort

Log

The element at index 0 is now in its final position and won't be touched again.

Chart

Selection Sort

Log

Looking for the smallest remaining value to place at index 1.

Chart

Selection Sort

Log

Comparing the element at index 2 against the smallest value found so far (index 1, value 2).

Chart

Selection Sort

Log

Comparing the element at index 2 against the smallest value found so far (index 1, value 2).

Chart

Selection Sort

Log

Comparing the element at index 3 against the smallest value found so far (index 1, value 2).

Chart

Selection Sort

Log

Comparing the element at index 3 against the smallest value found so far (index 1, value 2).

Chart

Selection Sort

Log

Comparing the element at index 4 against the smallest value found so far (index 1, value 2).

Chart

Selection Sort

Log

Comparing the element at index 4 against the smallest value found so far (index 1, value 2).

Chart

Selection Sort

Log

Comparing the element at index 5 against the smallest value found so far (index 1, value 2).

Chart

Selection Sort

Log

Comparing the element at index 5 against the smallest value found so far (index 1, value 2).

Chart

Selection Sort

Log

Comparing the element at index 6 against the smallest value found so far (index 1, value 2).

Chart

Selection Sort

Log

Comparing the element at index 6 against the smallest value found so far (index 1, value 2).

Chart

Selection Sort

Log

Comparing the element at index 7 against the smallest value found so far (index 1, value 2).

Chart

Selection Sort

Log

Comparing the element at index 7 against the smallest value found so far (index 1, value 2).

Chart

Selection Sort

Log

Comparing the element at index 8 against the smallest value found so far (index 1, value 2).

Chart

Selection Sort

Log

Comparing the element at index 8 against the smallest value found so far (index 1, value 2).

Chart

Selection Sort

Log

Comparing the element at index 9 against the smallest value found so far (index 1, value 2).

Chart

Selection Sort

Log

Comparing the element at index 9 against the smallest value found so far (index 1, value 2).

Chart

Selection Sort

Log

Comparing the element at index 10 against the smallest value found so far (index 1, value 2).

Chart

Selection Sort

Log

Comparing the element at index 10 against the smallest value found so far (index 1, value 2).

Chart

Selection Sort

Log

Comparing the element at index 11 against the smallest value found so far (index 1, value 2).

Chart

Selection Sort

Log

Comparing the element at index 11 against the smallest value found so far (index 1, value 2).

Chart

Selection Sort

Log

Comparing the element at index 12 against the smallest value found so far (index 1, value 2).

Chart

Selection Sort

Log

Comparing the element at index 12 against the smallest value found so far (index 1, value 2).

Chart

Selection Sort

Log

Index 1 already holds the smallest remaining value, so no swap is needed.

Chart

Selection Sort

Log

The element at index 1 is now in its final position and won't be touched again.

Chart

Selection Sort

Log

Looking for the smallest remaining value to place at index 2.

Chart

Selection Sort

Log

Comparing the element at index 3 against the smallest value found so far (index 2, value 9).

Chart

Selection Sort

Log

Element at index 3 is smaller than the previous minimum | it becomes the new smallest value found this

Chart

Selection Sort

Log

Comparing the element at index 4 against the smallest value found so far (index 3, value 5).

Chart

Selection Sort

Log

Comparing the element at index 4 against the smallest value found so far (index 3, value 5).

Chart

Selection Sort

Log

Comparing the element at index 5 against the smallest value found so far (index 3, value 5).

Chart

Selection Sort

Log

Comparing the element at index 5 against the smallest value found so far (index 3, value 5).

Chart

Selection Sort

Log

Comparing the element at index 6 against the smallest value found so far (index 3, value 5).

Chart

Selection Sort

Log

Element at index 6 is smaller than the previous minimum | it becomes the new smallest value found this

Chart

Selection Sort

Log

Comparing the element at index 7 against the smallest value found so far (index 6, value 2).

Chart

Selection Sort

Log

Comparing the element at index 7 against the smallest value found so far (index 6, value 2).

Chart

Selection Sort

Log

Comparing the element at index 8 against the smallest value found so far (index 6, value 2).

Chart

Selection Sort

Log

Comparing the element at index 8 against the smallest value found so far (index 6, value 2).

Chart

Selection Sort

Log

Comparing the element at index 9 against the smallest value found so far (index 6, value 2).

Chart

Selection Sort

Log

Comparing the element at index 9 against the smallest value found so far (index 6, value 2).

Chart

Selection Sort

Log

Comparing the element at index 10 against the smallest value found so far (index 6, value 2).

Chart

Selection Sort

Log

Comparing the element at index 10 against the smallest value found so far (index 6, value 2).

Chart

Selection Sort

Log

Comparing the element at index 11 against the smallest value found so far (index 6, value 2).

Chart

Selection Sort

Log

Comparing the element at index 11 against the smallest value found so far (index 6, value 2).

Chart

Selection Sort

Log

Comparing the element at index 12 against the smallest value found so far (index 6, value 2).

Chart

Selection Sort

Log

Comparing the element at index 12 against the smallest value found so far (index 6, value 2).

Chart

Selection Sort

Log

The smallest remaining value was found at index 6 | swapping it into index 2.

Chart

Selection Sort

Log

The element at index 2 is now in its final position and won't be touched again.

Chart

Selection Sort

Log

Looking for the smallest remaining value to place at index 3.

Chart

Selection Sort

Log

Comparing the element at index 4 against the smallest value found so far (index 3, value 5).

Chart

Selection Sort

Log

Comparing the element at index 4 against the smallest value found so far (index 3, value 5).

Chart

Selection Sort

Log

Comparing the element at index 5 against the smallest value found so far (index 3, value 5).

Chart

Selection Sort

Log

Comparing the element at index 5 against the smallest value found so far (index 3, value 5).

Chart

Selection Sort

Log

Comparing the element at index 6 against the smallest value found so far (index 3, value 5).

Chart

Selection Sort

Log

Comparing the element at index 6 against the smallest value found so far (index 3, value 5).

Chart

Selection Sort

Log

Comparing the element at index 7 against the smallest value found so far (index 3, value 5).

Chart

Selection Sort

Log

Element at index 7 is smaller than the previous minimum | it becomes the new smallest value found this

Chart

Selection Sort

Log

Comparing the element at index 8 against the smallest value found so far (index 7, value 3).

Chart

Selection Sort

Log

Comparing the element at index 8 against the smallest value found so far (index 7, value 3).

Chart

Selection Sort

Log

Comparing the element at index 9 against the smallest value found so far (index 7, value 3).

Chart

Selection Sort

Log

Comparing the element at index 9 against the smallest value found so far (index 7, value 3).

Chart

Selection Sort

Log

Comparing the element at index 10 against the smallest value found so far (index 7, value 3).

Chart

Selection Sort

Log

Comparing the element at index 10 against the smallest value found so far (index 7, value 3).

Chart

Selection Sort

Log

Comparing the element at index 11 against the smallest value found so far (index 7, value 3).

Chart

Selection Sort

Log

Comparing the element at index 11 against the smallest value found so far (index 7, value 3).

Chart

Selection Sort

Log

Comparing the element at index 12 against the smallest value found so far (index 7, value 3).

Chart

Selection Sort

Log

Comparing the element at index 12 against the smallest value found so far (index 7, value 3).

Chart

Selection Sort

Log

The smallest remaining value was found at index 7 | swapping it into index 3.

Chart

Selection Sort

Log

The element at index 3 is now in its final position and won't be touched again.

Chart

Selection Sort

Log

Looking for the smallest remaining value to place at index 4.

Chart

Selection Sort

Log

Comparing the element at index 5 against the smallest value found so far (index 4, value 7).

Chart

Selection Sort

Log

Comparing the element at index 5 against the smallest value found so far (index 4, value 7).

Chart

Selection Sort

Log

Comparing the element at index 6 against the smallest value found so far (index 4, value 7).

Chart

Selection Sort

Log

Comparing the element at index 6 against the smallest value found so far (index 4, value 7).

Chart

Selection Sort

Log

Comparing the element at index 7 against the smallest value found so far (index 4, value 7).

Chart

Selection Sort

Log

Element at index 7 is smaller than the previous minimum | it becomes the new smallest value found this

Chart

Selection Sort

Log

Comparing the element at index 8 against the smallest value found so far (index 7, value 5).

Chart

Selection Sort

Log

Comparing the element at index 8 against the smallest value found so far (index 7, value 5).

Chart

Selection Sort

Log

Comparing the element at index 9 against the smallest value found so far (index 7, value 5).

Chart

Selection Sort

Log

Comparing the element at index 9 against the smallest value found so far (index 7, value 5).

Chart

Selection Sort

Log

Comparing the element at index 10 against the smallest value found so far (index 7, value 5).

Chart

Selection Sort

Log

Comparing the element at index 10 against the smallest value found so far (index 7, value 5).

Chart

Selection Sort

Log

Comparing the element at index 11 against the smallest value found so far (index 7, value 5).

Chart

Selection Sort

Log

Element at index 11 is smaller than the previous minimum | it becomes the new smallest value found this

Chart

Selection Sort

Log

Comparing the element at index 12 against the smallest value found so far (index 11, value 4).

Chart

Selection Sort

Log

Comparing the element at index 12 against the smallest value found so far (index 11, value 4).

Chart

Selection Sort

Log

The smallest remaining value was found at index 11 | swapping it into index 4.

Chart

Selection Sort

Log

The element at index 4 is now in its final position and won't be touched again.

Chart

Selection Sort

Log

Looking for the smallest remaining value to place at index 5.

Chart

Selection Sort

Log

Comparing the element at index 6 against the smallest value found so far (index 5, value 12).

Chart

Selection Sort

Log

Element at index 6 is smaller than the previous minimum | it becomes the new smallest value found this

Chart

Selection Sort

Log

Comparing the element at index 7 against the smallest value found so far (index 6, value 9).

Chart

Selection Sort

Log

Element at index 7 is smaller than the previous minimum | it becomes the new smallest value found this

Chart

Selection Sort

Log

Comparing the element at index 8 against the smallest value found so far (index 7, value 5).

Chart

Selection Sort

Log

Comparing the element at index 8 against the smallest value found so far (index 7, value 5).

Chart

Selection Sort

Log

Comparing the element at index 9 against the smallest value found so far (index 7, value 5).

Chart

Selection Sort

Log

Comparing the element at index 9 against the smallest value found so far (index 7, value 5).

Chart

Selection Sort

Log

Comparing the element at index 10 against the smallest value found so far (index 7, value 5).

Chart

Selection Sort

Log

Comparing the element at index 10 against the smallest value found so far (index 7, value 5).

Chart

Selection Sort

Log

Comparing the element at index 11 against the smallest value found so far (index 7, value 5).

Chart

Selection Sort

Log

Comparing the element at index 11 against the smallest value found so far (index 7, value 5).

Chart

Selection Sort

Log

Comparing the element at index 12 against the smallest value found so far (index 7, value 5).

Chart

Selection Sort

Log

Comparing the element at index 12 against the smallest value found so far (index 7, value 5).

Chart

Selection Sort

Log

The smallest remaining value was found at index 7 | swapping it into index 5.

Chart

Selection Sort

Log

The element at index 5 is now in its final position and won't be touched again.

Chart

Selection Sort

Log

Looking for the smallest remaining value to place at index 6.
